

**An Introduction to Derivatives and Risk Management, 7<sup>th</sup> edition**  
**Don M. Chance and Robert Brooks**

Table of Contents

Preface

Chapter 1

*Introduction*

Derivative Markets and Instruments

*Options*

*Forward Contracts*

*Futures Contracts*

*Swaps and Other Derivatives*

The Underlying Asset

Important Concepts in Financial and Derivative Markets

*Risk Preference*

*Short Selling*

*Repurchase Agreements*

*Return and Risk*

*Market Efficiency and Theoretical Fair Value*

Fundamental Linkages between Spot and Derivative Markets

*Arbitrage and the Law of One Price*

*The Storage Mechanism: Spreading Consumption across Time*

*Delivery and Settlement*

The Role of Derivative Markets

*Risk Management*

*Price Discovery*

*Operational Advantages*

*Market Efficiency*

Criticisms of Derivative Markets

Misuses of Derivatives

Derivatives and Your Career

Sources of Information on Derivatives

Book Overview

*Organization of the Book*

*Key Features of the Book*

*Specific New Features of the Seventh Edition*

*Use of the Book*

Summary

Key Terms

Further Reading

Questions and Problems

## **PART I**

### **Options**

Chapter 2

*Structure of Options Markets*

Development of Options Markets

Call Options

Put Options

Over-the-Counter Options Market

Organized Options Trading

*Listing Requirements*

*Contract Size*

*Exercise Prices*

*Expiration Dates*

*Position and Exercise Limits*

Options Exchanges and Trading Activity

Option Traders

*Market Maker*

*Floor Broker*

*Order Book Official*

*Other Option Trading Systems*

*Off-Floor Option Traders*

*Cost and Profitability of Exchange Membership*

Mechanics of Trading

*Placing an Opening Order*

*Role of the Clearinghouse*

*Placing an Offsetting Order*

*Exercising an Option*

Option Price Quotations

Types of Options

*Stock Options*

*Index Options*

*Currency Options*

*Other Types of Options*

*Real Options*

Transaction Costs in Option Trading

*Floor Trading and Clearing Fees*

*Commissions*

*Bid-Ask Spread*

*Other Transaction Costs*

Regulation of Options Markets

Summary

Key Terms

Further Reading

Questions and Problems

Appendix 2.A: Margin Requirements

*Margin Requirements on Stock Transactions*

*Margin Requirements on Option Purchases*

*Margin Requirements on the Uncovered Sale of Options*

*Margin Requirements on Covered Calls*

*Questions and Problem*

Appendix 2.B: Taxation of Option Transactions

*Taxation of Long Call Transactions*

*Taxation of Short Call Transactions*

*Taxation of Long Put Transactions*

*Taxation of Short Put Transactions*

*Taxation of Non-Equity Options*

*Wash and Constructive Sales*

*Questions and Problems*

Chapter 3

*Principles of Option Pricing*

Basic Notation and Terminology

Principles of Call Option Pricing

*Minimum Value of a Call*

*Maximum Value of a Call*

*Value of a Call at Expiration*

*Effect of Time to Expiration*

*Effect of Exercise Price*

*Lower Bound of a European Call*

*American Call Versus European Call*

*Early Exercise of American Calls on Dividend-Paying Stocks*

*Effect of Interest Rates*

*Effect of Stock Volatility*

Principles of Put Option Pricing

*Minimum Value of a Put*

*Maximum Value of a Put*  
*Value of a Put at Expiration*  
*Effect of Time to Expiration*  
*The Effect of Exercise Price*  
*Lower Bound of a European Put*  
*American Put Versus European Put*  
*Early Exercise of American Puts*  
*Put-Call Parity*  
*Effect of Interest Rates*  
*Effect of Stock Volatility*

Summary

Key Terms

Further Reading

Questions and Problems

Appendix 3: The Dynamics of Option Boundary Conditions: A Learning Exercise

Chapter 4

*Option Pricing Models: The Binomial Model*

One-Period Binomial Model

*Illustrative Example*

*Hedge Portfolio*

*Overpriced Call*

*Underpriced Call*

Two-Period Binomial Model

*Illustrative Example*

*Hedge Portfolio*

*Mispriced Call in the Two-Period World*

Extensions of the Binomial Model

*Pricing Put Options*

*American Puts and Early Exercise*

*Dividends, European Calls, American Calls, and Early Exercise*

*Extending the Binomial Model to  $n$  Periods*

*Behavior of the Binomial Model for Large  $n$  and Fixed Option Life*

*Alternative Specifications of the Binomial Model*

*Advantages of the Binomial Model*

SOFTWARE DEMONSTRATION 4.1

*Calculating the Binomial Price with the Excel Spreadsheet BSMbin7e.xls*

Summary

Key Terms

Further Reading

Questions and Problems

Chapter 5

*Option Pricing Models: The Black-Scholes-Merton Model*

Origins of the Black-Scholes-Merton Formula

Black-Scholes-Merton Model as the Limit of the Binomial Model

Assumptions of the Black-Scholes-Merton Model

*Stock Prices Behave Randomly and Evolve According to a Lognormal Distribution*

*Risk-Free Rate and Volatility of the Log Return on the Stock are Constant  
Throughout the Option's Life*

*No Taxes or Transaction Costs*

*Stock Pays No Dividends*

*Options Are European*

A Nobel Formula

*Digression on Using the Normal Distribution*

*Numerical Example*

SOFTWARE DEMONSTRATION 5.1

*Calculating the Black-Scholes-Merton Price with the Excel Spreadsheet  
BSMbin7e.xls*

*Characteristics of the Black-Scholes-Merton Formula*

Variables in the Black-Scholes-Merton Model

*Stock Price*

*Exercise Price*

*Risk-Free Rate*

*Volatility or Standard Deviation*

*Time to Expiration*

Black-Scholes-Merton Model When the Stock Pays Dividends

*Known Discrete Dividends*

*Known Continuous Dividend Yield*

Black-Scholes-Merton Model and Some Insights into American Call Options

Estimating the Volatility

*Historical Volatility*

*Implied Volatility*

SOFTWARE DEMONSTRATION 5.2

*Calculating the Historical Volatility with the Excel Spreadsheet Hisv7e.xls*

Put Option Pricing Models

Managing the Risk of Options

Summary

Key Terms

Further Reading

Questions and Problems

Appendix 5.A: A Shortcut to the Calculation of Implied Volatility

Appendix 5.B: The BSMbwin7e.exe Windows Software

Chapter 6

*Basic Option Strategies*

Terminology and Notation

*Profit Equations*

*Different Holding Periods*

*Assumptions*

Stock Transactions

*Buy Stock*

*Sell Short Stock*

Call Option Transactions

*Buy a Call*

*Write a Call*

Put Option Transactions

*Buy a Put*

*Write a Put*

Calls and Stock: The Covered Call

*Some General Considerations with Covered Calls*

Puts and Stock: The Protective Put

Synthetic Puts and Calls

SOFTWARE DEMONSTRATION 6.1

*Analyzing Option Strategies with the Excel Spreadsheet Stratlyz7e.xls*

Summary

Key Terms

Questions and Problems

Chapter 7

*Advanced Option Strategies*

Option Spreads: Basic Concepts

*Why Investors Use Option Spreads*

*Notation*

Money Spreads

*Bull Spreads*

*Bear Spreads*

*A Note about Call Bear Spreads and Put Bull Spreads*

*Collars*  
*Butterfly Spreads*  
Calendar Spreads  
*Time Value Decay*  
Ratio Spreads  
Straddles  
Box Spreads  
Summary  
Key Terms  
Further Reading  
Questions and Problems

## **PART II**

### **Forwards, Futures, and Swaps**

#### Chapter 8

##### *The Structure of Forward and Futures Markets*

##### Development of Forward and Futures Markets

*Chicago Futures Markets*

*Development of Financial Futures*

*Development of Options on Futures Markets*

*Parallel Development of Over-the-Counter Markets*

##### Over-the-Counter Forward Market

##### Organized Futures Trading

*Contract Development*

*Contract Terms and Conditions*

*Delivery Terms*

*Daily Price Limits and Trading Halts*

*Other Exchange Responsibilities*

##### Futures Exchanges

##### Futures Traders

*General Classes of Futures Traders*

*Classification by Trading Strategy*

*Classification by Trading Style*

*Off-Floor Futures Traders*

*Costs and Profitability of Exchange Membership*

*Forward Market Traders*

##### Mechanics of Futures Trading

*Placing an Order*

*Role of the Clearinghouse*

*Daily Settlement*

*Delivery and Cash Settlement*

Futures Price Quotations

Types of Futures Contracts

*Agricultural Commodities*

*Natural Resources*

*Miscellaneous Commodities*

*Foreign Currencies*

*Federal Funds and Eurodollars*

*Treasury Notes and Bonds*

*Swap Futures*

*Equities*

*Managed Funds*

*Hedge Funds*

*Options on Futures*

Transaction Costs in Forward and Futures Trading

*Commissions*

*Bid-Ask Spread*

*Delivery Costs*

Regulation of Futures and Forward Markets

Summary

Key Terms

Further Reading

Questions and Problems

Appendix 8: Taxation of Futures Transactions in the United States

*Questions and Problems*

Chapter 9

*Principles of Pricing Forwards, Futures, and Options on Futures*

Generic Carry Arbitrage

*Concept of Price versus Value*

*Value of a Forward Contract*

*Price of a Forward Contract*

*Value of a Futures Contract*

*Price of a Futures Contract*

*Forward versus Futures Prices*

Carry Arbitrage When Underlying Generates Cash Flows

*Stock Indices and Dividends*

*Foreign Currencies and Foreign Interest Rates: Interest Rate Parity*

*Commodities and Storage Costs*

Pricing Models and Risk Premiums

*Spot Prices, Risk Premiums, and Carry Arbitrage for Generic Assets*

*Forward/Futures Pricing Revisited*

*Futures Prices and Risk Premia*

*Put-Call-Forward/Futures Parity*

Pricing Options on Futures

*Intrinsic Value of an American Option on Futures*

*Lower Bound of a European Option on Futures*

*Put-Call Parity of Options on Futures*

*Early Exercise of Call and Put Options on Futures*

*Black Futures Option Pricing Model*

Summary

Key Terms

Further Reading

Questions and Problems

Chapter 10

*Futures Arbitrage Strategies*

Short-Term Interest Rate Arbitrage

*Carry Arbitrage and the Implied Repo Rate*

*Federal Funds Futures Carry Arbitrage and the Implied Repo Rate*

*Eurodollar Arbitrage*

Intermediate- and Long-Term Interest Rate Arbitrage

*Determining the Cheapest-to-Deliver Bond on the Treasury Bond Futures Contract*

*Delivery Options*

*Implied Repo, Carry Arbitrage and Treasury Bond Futures*

SOFTWARE DEMONSTRATION 10.1

*Identifying the Cheapest-to-Deliver Bond with the Excel Spreadsheet CTD7e.xls*

*Treasury Bond Futures Spreads and the Implied Repo Rate*

Stock Index Arbitrage

Foreign Exchange Arbitrage

Summary

Key Terms

Further Reading

Questions and Problems

Appendix 10: Determining the CBOT Treasury Bond Conversion Factor

SOFTWARE DEMONSTRATION 10.2

*Determining the CBOT Conversion Factor with the Excel Spreadsheet CF7e.xls*

## Chapter 11

### *Forward and Futures Hedging, Spread, and Target Strategies*

#### Why Hedge?

#### Hedging Concepts

*Short Hedge and Long Hedge*

*The Basis*

*Some Risks of Hedging*

*Contract Choice*

*Margin Requirements and Marking to Market*

#### Determination of the Hedge Ratio

*Minimum Variance Hedge Ratio*

*Price Sensitivity Hedge Ratio*

*Stock Index Futures Hedging*

#### Hedging Strategies

*Foreign Currency Hedges*

*Intermediate- and Long-Term Interest Rate Hedges*

#### Spread Strategies

*Intramarket Spreads*

*Intermarket Spreads*

#### Target Strategies

*Target Duration with Bond Futures*

*Alpha Capture*

*Target Beta with Stock Index Futures*

*Tactical Asset Allocation Using Stock and Bond Futures*

#### Summary

#### Key Terms

#### Further Reading

#### Questions and Problems

#### Appendix 11: Taxation of Hedging

## Chapter 12

### *Swaps*

#### Interest Rate Swaps

*Structure of a Typical Interest Rate Swap*

*Pricing and Valuation of Interest Rate Swaps*

*Interest Rate Swap Strategies*

#### Currency Swaps

*Structure of a Typical Currency Swap*

*Pricing and Valuation of Currency Swaps*  
*Currency Swap Strategies*

Equity Swaps

*Structure of a Typical Equity Swap*  
*Pricing and Valuation of Equity Swaps*  
*Equity Swap Strategies*

Some Final Words about Swaps

Summary

Key Terms

Further Reading

Questions and Problems

### **PART III**

#### **Advanced Topics**

Chapter 13

*Interest Rate Forwards and Options*

Forward Rate Agreements

*Structure and Use of a Typical FRA*  
*Pricing and Valuation of FRAs*  
*Applications of FRAs*

Interest Rate Options

*Structure and Use of a Typical Interest Rate Option*  
*Pricing and Valuation of Interest Rate Options*  
*Interest Rate Option Strategies*  
*Interest Rate Caps, Floors, and Collars*  
*Interest Rate Options, FRAs, and Swaps*  
Interest Rate Swaptions and Forward Swaps  
*Structure of a Typical Interest Rate Swaption*  
*Equivalence of Swaptions and Options on Bonds*  
*Pricing Swaptions*  
*Forward Swaps*  
*Applications of Swaptions and Forward Swaps*

Summary

Key Terms

Further Reading

Questions and Problems

Chapter 14

*Advanced Derivatives and Strategies*

Advanced Equity Derivatives and Strategies

*Portfolio Insurance*

*Equity Forwards*

*Equity Warrants*

*Equity-Linked Debt*

Advanced Interest Rate Derivatives

*Structured Notes*

*Mortgage-Backed Securities*

Exotic Options

*Digital and Chooser Options*

*Path-Dependent Options*

*Other Exotic Options*

Some Unusual Derivatives

*Electricity Derivatives*

*Weather Derivatives*

Summary

Key Terms

Further Reading

Questions and Problems

Appendix 14: Monte Carlo Simulation

Chapter 15

*Financial Risk Management Techniques and Applications*

Why Practice Risk Management?

*Impetus for Risk Management*

*Benefits of Risk Management*

Managing Market Risk

*Delta Hedging*

*Gamma Hedging*

*Vega Hedging*

*Value at Risk (VAR)*

*A Comprehensive Calculation of VAR*

*Benefits and Criticisms of VAR*

*Extensions of VAR*

Managing Credit Risk

*Credit Risk as an Option*

*Credit Risk of Derivatives*

*Netting*

*Credit Derivatives*

Other Types of Risks

Summary

Key Terms

Further Reading

Questions and Problems

Chapter 16

*Managing Risk in an Organization*

The Structure of the Risk Management Industry

*End Users*

*Dealers*

*Other Participants in the Risk Management Industry*

Organizing the Risk Management Function in a Company

Risk Management Accounting

*Fair Value Hedges*

*Cash Flow Hedges*

*Foreign Investment Hedges*

*Speculation*

*Some Problems in the Application of FAS 133*

*Disclosure*

Avoiding Derivatives Losses

*Metallgesellschaft: To Hedge or Not to Hedge?*
