Contents

Preface ........................................................................................................... xvi

CHAPTER 1
Introduction ................................................................................................. 1
Derivative Markets and Instruments ............................................................ 2
   Options  2
   Forward Contracts  3
   Futures Contracts  3
   Swaps and Other Derivatives  4
The Underlying Asset  4
Important Concepts in Financial and Derivative Markets ...................... 5
   Risk Preference  5
   Short Selling  5
   Repurchase Agreements  6
   Return and Risk  7
   Market Efficiency and Theoretical Fair Value  8
Making the Connection
   Risk and Return and Arbitrage  9

Fundamental Linkages between Spot and Derivative Markets .......... 10
   Arbitrage and the Law of One Price  10
   The Storage Mechanism: Spreading Consumption across Time  11
   Delivery and Settlement  12
Role of Derivative Markets ................................................................. 12
   Risk Management  12
Making the Connection
   Jet Fuel Risk Management at Southwest Airlines  13
   Price Discovery  13
   Operational Advantages  14
   Market Efficiency  14
Criticisms of Derivative Markets .......................................................... 14
Misuses of Derivatives ........................................................................... 15
Derivatives and Your Career ............................................................... 15
Sources of Information on Derivatives .................................................. 16
Book Overview ......................................................................................... 16
   Organization of the Book  16
   Key Features of the Book  17
   Specific New Features of the Eighth Edition  18
   Use of the Book  19
Summary .................................................................................................. 19
Key Terms ................................................................................................. 19
Further Reading ....................................................................................... 20
Concept Checks ....................................................................................... 20
Questions and Problems ......................................................................... 20
PART I Options

CHAPTER 2 Structure of Options Markets ................................................. 24
Development of Options Markets 24
Call Options 26
Put Options 26
Over-the-Counter Options Market 27
Organized Options Trading 28
   Listing Requirements 29
   Contract Size 29
   Exercise Prices 30
   Expiration Dates 30
   Position and Exercise Limits 31
Options Exchanges and Trading Activity 31
Option Traders 32
   Market Maker 33
   Floor Broker 33
   Order Book Official 34
   Other Option Trading Systems 34
   Off-Floor Option Traders 34
   Cost and Profitability of Exchange Membership 35
Mechanics of Trading 36
   Placing an Opening Order 36
   Role of the Clearinghouse 36
   Placing an Offsetting Order 38
   Exercising an Option 39
Option Price Quotations 40
Making the Connection
   Reading Option Price Quotations 40
Types of Options 42
   Stock Options 42
   Index Options 42
   Currency Options 43
   Other Types of Options 43
   Real Options 44
Transaction Costs in Option Trading 45
   Floor Trading and Clearing Fees 45
   Commissions 45
   Bid-Ask Spread 45
   Other Transaction Costs 46
Regulation of Options Markets 46
Making the Connection
   Suspicious Put Option Trading and Bear Stearns & Co., Inc. Implosion 47
Summary 48
Key Terms 48
Further Reading 49
Concept Checks 49
Questions and Problems 49
Appendix 2.A: Margin Requirements 51
Margin Requirements on Stock Transactions 51
Margin Requirements on Option Purchases 51
Margin Requirements on the Uncovered Sale of Options 51
Margin Requirements on Covered Calls 52
Questions and Problems 52

Appendix 2.B: Taxation of Option Transactions 53
Taxation of Long Call Transactions 53
Taxation of Short Call Transactions 53
Taxation of Long Put Transactions 54
Taxation of Short Put Transactions 54
Taxation of Non-Equity Options 54
Wash and Constructive Sales 55
Questions and Problems 55

CHAPTER 3
Principles of Option Pricing ............................................................ 57
Basic Notation and Terminology 58
Principles of Call Option Pricing 60
Minimum Value of a Call 60
Maximum Value of a Call 61
Value of a Call at Expiration 62
Effect of Time to Expiration 63
Effect of Exercise Price 65
Lower Bound of a European Call 68
Making the Connection
Asynchronous Closing Prices and Apparent Boundary Condition Violations 70
American Call Versus European Call 71
Early Exercise of American Calls on Dividend-Paying Stocks 72
Effect of Interest Rates 73
Effect of Stock Volatility 73
Principles of Put Option Pricing 74
Minimum Value of a Put 74
Maximum Value of a Put 76
Value of a Put at Expiration 76
Effect of Time to Expiration 77
The Effect of Exercise Price 78
Lower Bound of a European Put 80
American Put Versus European Put 82
Early Exercise of American Puts 82
Put-Call Parity 83
Effect of Interest Rates 85
Effect of Stock Volatility 86
Making the Connection
Put-Call Parity Arbitrage 87
Summary 88
Key Terms 89
Further Reading 89
Concept Checks 90
Questions and Problems 90
Appendix 3: Dynamics of Option Boundary Conditions: A Learning Exercise 93
CHAPTER 4
Option Pricing Models: The Binomial Model ........................................ 95

One-Period Binomial Model 95
Illustrative Example 99
Hedge Portfolio 99
Overpriced Call 100
Underpriced Call 101

Two-Period Binomial Model 101
Making the Connection
Binomial Option Pricing, Risk Premiums, and Probabilities 102
Illustrative Example 105
Hedge Portfolio 106
Mispriced Call in the Two-Period World 107

Extensions of the Binomial Model 109
Pricing Put Options 109
American Puts and Early Exercise 111
Dividends, European Calls, American Calls, and Early Exercise 111
Extending the Binomial Model to n Periods 116
Behavior of the Binomial Model for Large n and Fixed Option Life 118
Alternative Specifications of the Binomial Model 119
Advantages of the Binomial Model 121

Making the Connection
Uses of the Binomial Option Pricing Framework in Practice 122

Software Demonstration 4.1
Calculating the Binomial Price with the Excel Spreadsheet BSMbin8e.xls 123

Summary 124
Key Terms 124
Further Reading 124
Concept Checks 125
Questions and Problems 125

CHAPTER 5
Option Pricing Models: The Black-Scholes-Merton Model ...................... 127

Origins of the Black-Scholes-Merton Formula 127

Black-Scholes-Merton Model as the Limit of the Binomial Model 128

Making the Connection
Logarithms, Exponentials, and Finance 130

Assumptions of the Black-Scholes-Merton Model 131
Stock Prices Behave Randomly and Evolve According to a Lognormal Distribution 132
Risk-Free Rate and Volatility of the Log Return on the Stock
Are Constant Throughout the Option’s Life 134
No Taxes or Transaction Costs 135
Stock Pays No Dividends 135
Options Are European 135

A Nobel Formula 135
Digression on Using the Normal Distribution 136
Numerical Example 138
Characteristics of the Black-Scholes-Merton Formula 139
CHAPTER 9
Principles of Pricing Forwards, Futures, and Options on Futures ............... 287

Generic Carry Arbitrage 288
  Concept of Price Versus Value 288
  Value of a Forward Contract 289
  Price of a Forward Contract 290
  Value of a Futures Contract 291

Making the Connection
  When Forward and Futures Contracts Are the Same 292
  Price of a Futures Contract 294
  Forward Versus Futures Prices 294

Carry Arbitrage When Underlying Generates Cash Flows 295
  Stock Indices and Dividends 295
  Foreign Currencies and Foreign Interest Rates: Interest Rate Parity 298
  Commodities and Storage Costs 300

Pricing Models and Risk Premiums 300
  Spot Prices, Risk Premiums, and Carry Arbitrage for Generic Assets 301
  Forward/Futures Pricing Revisited 302
  Futures Prices and Risk Premia 307
  Put-Call-Forward/Futures Parity 312

Pricing Options on Futures 313
  Intrinsic Value of an American Option on Futures 313
  Lower Bound of a European Option on Futures 314
  Put-Call Parity of Options on Futures 316
  Early Exercise of Call and Put Options on Futures 317
  Black Futures Option Pricing Model 319

Summary 321

Key Terms 323

Further Reading 324

Concept Checks 324

Questions and Problems 324

CHAPTER 10
Futures Arbitrage Strategies ................................................................. 327

Short-Term Interest Rate Arbitrage 327
  Carry Arbitrage and the Implied Repo Rate 327
  Federal Funds Futures Carry Arbitrage and the Implied Repo Rate 329
  Eurodollar Arbitrage 331

Intermediate- and Long-Term Interest Rate Arbitrage 332
  Determining the Cheapest-to-Deliver Bond on the Treasury Bond Futures Contract 334
  Delivery Options 337
  Implied Repo, Carry Arbitrage, and Treasury Bond Futures 340

Software Demonstration 10.1
  Identifying the Cheapest-to-Deliver Bond with the Excel Spreadsheet CTD8e.xls 340

Treasury Bond Futures Spreads and the Implied Repo Rate 342

Stock Index Arbitrage 343
CHAPTER 11
Forward and Futures Hedging, Spread, and Target Strategies

Why Hedge? 356

Hedging Concepts 357
  Short Hedge and Long Hedge 357
  The Basis 358
  Some Risks of Hedging 362
  Contract Choice 363
  Margin Requirements and Marking to Market 366

Determination of the Hedge Ratio 367
  Minimum Variance Hedge Ratio 368
  Price Sensitivity Hedge Ratio 369
  Stock Index Futures Hedging 371

Hedging Strategies 372
  Foreign Currency Hedges 373
  Intermediate- and Long-Term Interest Rate Hedges 375

Making the Connection
  Hedging Contingent Foreign Currency Risk 376

Making the Connection
  Using Derivatives in Takeovers 384

Spread Strategies 384
  Intramarket Spreads 386
  Intermarket Spreads 388

Target Strategies 391
  Target Duration with Bond Futures 391
  Alpha Capture 393
  Target Beta with Stock Index Futures 396
  Tactical Asset Allocation Using Stock and Bond Futures 397

Summary 401

Key Terms 402

Further Reading 402

Concept Checks 402

Questions and Problems 403

Appendix 11: Taxation of Hedging 406
CHAPTER 14
Advanced Derivatives and Strategies

Advanced Equity Derivatives and Strategies

Portfolio Insurance 484
Equity Forwards 489

Making the Connection

Portfolio Insurance in a Crashing Market 491
Equity Warrants 493
Equity-Linked Debt 493

Advanced Interest Rate Derivatives 494
Structured Notes 494
Mortgage-Backed Securities 496

Exotic Options 501
Digital andChooser Options 502
Path-Dependent Options 505
Other Exotic Options 511

Making the Connection

Accumulator Contracts 512

Some Unusual Derivatives 512
Electricity Derivatives 513
Weather Derivatives 513

Summary 514
Key Terms 515
Further Reading 515
Concept Checks 516
Questions and Problems 516

Appendix 14: Monte Carlo Simulation 519

CHAPTER 15
Financial Risk Management Techniques and Applications

Why Practice Risk Management? 521
Impetus forRisk Management 521
Benefits of Risk Management 523

Managing Market Risk 524
Delta Hedging 525
Gamma Hedging 527
Vega Hedging 529
Value at Risk (VAR) 531
A Comprehensive Calculation of VAR 537
Benefits and Criticisms of VAR 539
Extensions of VAR 540

Managing Credit Risk 541
Credit Risk as an Option 542
Credit Risk of Derivatives 544
