Stephen Tomlinson, vice president of operations support for Cameron International Corporation, will be on campus Friday, September 18, 2009, as part of the LSU Flores MBA Distinguished Speaker Series. The lecture will take place at LSU’s Energy, Coast & Environment Building, located on Nicholson Drive Extension, from 10 a.m.-12 p.m.

Prior to joining Cameron, a leading provider of flow equipment products, systems and services to worldwide oil, gas and process industries, Tomlinson was the vice president of Manufacturing for Vecto Gray, and previously spent 23 years working for General Electric. A graduate of GE’s Manufacturing Management Program, Tomlinson held various operations, manufacturing, engineering and quality management positions within GE’s transportation, ordinance systems and power systems. He received his bachelor’s of science in industrial technology from SUNY Buffalo State College and received an M.B.A. from Rensselaer Polytechnic Institute.

The LSU Flores MBA Distinguished Speaker Series affords students opportunities to gain insight into the ideas and forces shaping American and international business from industry leaders responsible for creating and utilizing such driving forces on a daily basis. Interaction with these executives provides significant educational enrichment and complements the program’s standard curriculum. All DSS events are at 10:00 a.m. at the Energy & Coast Auditorium on the LSU main campus.
