

*Risk.*

It's a factor calculated into all big-time sports operations. But baseball was completely unprepared for the risk this season—major league murder in the stands.

When Fleet Walker, internal auditor for the New York Yankees, figures out that the killers are striking on the anniversaries of perfect games, he becomes embroiled in a plot to hold the national pastime for ransom. Working with a forensic accountant and an FBI agent, he is on the trail of the killers, using his skills as an auditor and his knowledge of baseball history to try to save baseball and its fans.

This teaching novel is designed to supplement a forensic auditing, internal auditing, or fraud examination course. Topics covered include interviewing, internal controls, risk assessment, fraud detection, and many more. Students will enjoy the suspense of this psychological thriller that integrates the fundamentals of forensic accounting and brings its applications to life, and they will learn important techniques and concepts as the mystery unfolds and Fleet Walker moves closer to nabbing the killers.

**D. Larry Crumbley** (CPA, CFFA, Cr.FA, FCPA) is the KPMG Endowed Professor of Accounting at Louisiana State University. He is the author of more than fifty books under his own name and as Iris Weil Collett.
